FOR ALL

# FORALL COMPANY

# PROFILE

## CENNI STORICI

FORALL è un'azienda di Verona fondata del 1987 e specializzata nella produzione di corpi illuminanti prevalentemente tecnici. Il motore trainante di ForAll è il proprio dipartimento di ricerca e sviluppo che, grazie al suo staff tecnico, dispone di molteplici soluzioni illuminotecniche sia standard che custom, con particolare attenzione al mondo Office, Retail e Gdo.

Il continuo impegno verso la qualità, ha permesso di certificare l'azienda ISO 9001 in modo che tutti i processi produttivi possano, non solo essere controllati minuziosamente, ma garantiti da un ciclo produttivo condiviso da tutti i collaboratori.

FORALL is a company based in Verona, founded in 1987 and specialized in the production of predominantly technical lighting bodies. The driving force of ForAll is its own research and development department which, thanks to its technical staff, has multiple standard and custom lighting solutions, with particular attention to the Office, Retail and Gdo world. The continuous commitment to quality has allowed the company to certify ISO 9001 so that all production processes can not only be meticulously controlled, but guaranteed by a production cycle shared by all collaborators.

## MISSION

La mission di ForAll è vivere la luce come supporto al benessere dell'uomo. Ambisce infatti a creare un'impresa di comunità per l'economia circolare, nella quale ognuno valorizzi il proprio talento e lo metta a servizio del prossimo. Un'impresa di comunità è il luogo dove tutti gli stakeholder dell'azienda, a seconda della loro mansione e ruolo, possono trarre dal proprio lavoro quotidiano il frutto per la costruzione della loro vita familiare e, nello stesso tempo, grazie alle logiche operative introdotte in azienda, creino una comunità aziendale che sia a servizio del cliente e sia riconosciuta per l'alta professionalità resa alla collettività.

The mission of ForAll is to live light as a support to human well-being. It aspires to create a community enterprise for the circular economy, in which everyone values their own talent and puts it at the service of others. A community enterprise is the place where all the company's stakeholders, depending on their task and role, can draw from their daily work the fruit for the construction of their family life and, at the same time, thanks to the operational logics introduced in the company, create a corporate community that is at the service of the customer and is recognized for the high professionalism rendered to the community.

## VISION

ForAll vuole proporre nuove idee per l'illuminazione sia in territorio nazionale che internazionale, garantendo prezzi accessibili per una distribuzione su larga scala. La nostra ambizione è garantire una sostenibilità aziendale che si orienti al rispetto dell'ambiente sfruttando le risorse rinnovabili ed il risparmio energetico, pertanto, si è creato un comitato di gestione che ogni settimana affronta con una riunione strutturata questi temi. Il lavoro in team porta continui spunti di riflessione e la risoluzione di criticità, trasforma ogni problema in opportunità di crescita, formazione continua per l'azienda e tutti i suoi collaboratori.

ForAll wants to propose new ideas for lighting both in national and international territory, guaranteeing affordable prices for large-scale distribution. Our ambition is to guarantee a corporate sustainability that is oriented to respect for the environment by exploiting renewable resources and energy saving, therefore, a management committee has been created that every week faces these issues with a structured meeting. Teamwork brings continuous food for thought and the resolution of critical issues, transforms every problem into an opportunity for growth, continuous training for the company and all its collaborators.

## SISTEMA DI GESTIONE CASAMBI CASAMBI MANAGEMENT SYSTEM

La gestione della luce è divenuta elemento imprescindibile per scolpire scenografie luminose che contribuiscono a disegnare e personalizzare l'ambiente luminoso attorno alla persona.

E' noto da tempo il grande contributo che la luce offre al benessere della persona, per farle trovare il giusto equilibrio con gli spazi e trarne il massimo beneficio fisico che si riverbera in una maggiore produttività ed in un migliore coinvolgimento. Le tecnologie moderne consentono di modulare gli scenari luminosi utilizzando strumenti di uso comune come un telefono cellulare o un tablet, ormai integrati nel vissuto quotidiano delle persone.

FOR ALL, da sempre sensibile all'innovazione tecnologica, introduce nelle proprie soluzioni la tecnologia wireless CASAMBI, che adotta il Bluetooth, universalmente implementato in tutti i moderni Smartphone e tablet, come vettore di comunicazione tra la persona e gli apparecchi di illuminazione.

La tecnologia CASAMBI è integrata nei modelli denominati BT, creando quindi le condizioni ottimali d'uso, di installazione e funzionalità con dispositivi semplici a costi ridotti.

I componenti CASAMBI stabiliscono una rete di comunicazione Mesh dove tutta l'intelligenza del sistema è replicata in ogni singolo nodo, questo significa che non vi sono singoli punti di guasto tali da pregiudicare l'intera struttura della comunicazione. Il sistema è autoriparante ed in costante sincronizzazione; in questa architettura distribuita e simmetrica ogni unità/apparecchio può essere spenta e riprendere a funzionare non appena ne viene ripristinata l'alimentazione, ricordando l'ultimo stato di accensione.

Una semplice APP consente di gestire l'impianto, lavorando come interfaccia utente per il controllo puntuale o a gruppi degli apparecchi di illuminazione, come strumento per la messa in servizio dell'impianto e come gateway remoto per la connessione con il Cloud. Il sistema è intuitivo, non necessita di connessioni elettriche tra gli apparecchi (linea bus), interruttori e non richiede una connessione Internet per operare. E' il sistema ideale per ammodernare un impianto di illuminazione già esistente senza interventi strutturali.

The management of light has become an essential element to sculpt luminous scenarios that contribute to designing and personalizing the luminous environment around the person.

It has long been known the great contribution that light offers to the well-being of the person, to make them find the right balance with spaces and derive the maximum physical benefit that is reflected in greater productivity and better involvement. Modern technologies allow to modulate the luminous scenarios using common tools such as a mobile phone or a tablet, now integrated into the daily life of people.

FOR ALL, always sensitive to technological innovation, introduces in its solutions the CASAMBI wireless technology, which adopts Bluetooth, universally implemented in all modern smartphones and tablets, as a communication vector between the person and the lighting devices. CASAMBI technology is integrated into the models called SMART, thus creating optimal conditions of use, installation and functionality with simple devices at reduced costs. CASAMBI components establish a Mesh communication network where all the intelligence of the system is replicated in each single node, this means that there are no single points of failure that can prejudice the entire structure of communication. The system is self-repairing and in constant synchronization; in this distributed and symmetrical architecture each unit/device can be turned off and resume functioning as soon as its power supply is restored, remembering the last state of ignition.

A simple APP allows to manage the system, working as a user interface for the punctual or group control of the lighting devices, as a tool for the commissioning of the system and as a remote gateway for the connection with the Cloud. The system is intuitive, does not require electrical connections between the devices (bus line), switches and does not require an Internet connection to operate. It is the ideal system to modernize an existing lighting system without structural interventions.

La sagomazione, conosciuta anche come illuminazione a contorni definiti, è una forma di illuminazione che i curatori e i progettisti di illuminazione utilizzano per creare fasci di luce con bordi ben definiti. Questo metodo è usato per illuminare accuratamente le opere d'arte esposte nei musei e nelle gallerie.

Shaping, also known as sharp edge lighting, is a form of lighting that curators and lighting designers use to create beams of light with well-defined edges. This method is used to accurately illuminate works of art displayed in museums and galleries.

FORALL offre una copertura di garanzia di 5 anni. La garanzia è valida esclusivamente per i guasti del prodotto dovuto a difetti del materiale, costruttivi o di produzione, nonché per le percentuali di guasto che eccedono quelle nominali (2/1000 ogni 1000h). La garanzia non copre eventuali difetti o danni causati dall'utilizzo errato del prodotto o da installazione non conforme a quanto previsto nelle istruzioni fornite con l'apparecchio. Resta inteso che i costi di disinstallazione/installazione/spedizione dei prodotti sono a carico dell'acquirente. FORALL si riserva la possibilità nel rispetto delle norme in vigore, di apportare senza preavviso modifiche tecniche atte a migliorare le caratteristiche dei prodotti.

FORALL offers a 5-year warranty coverage. The warranty is only valid for product failures due to material, construction or production defects, as well as for failure rates exceeding the nominal ones (2/1000 every 1000h). The warranty does not cover any defects or damage caused by incorrect use of the product or by any installation that does not comply with the instructions supplied with the appliance. It is understood that the costs for product removal/installation/shipment are charged to the buyer. FORALL reserves the right to make technical changes to improve the product features without prior notice, in compliance with the regulations in force.

## SKILUX VALAISTUS

[www.skilux.fi](http://www.skilux.fi)

SKILUX – palveleva valaisintukku. Yksityinen, 1998 perustettu, suomalainen valaisintukku palvelee kaikessa valaistukseen liittyvässä niin Suomessa kuin muualakin Euroopassa. Skilux Oy on valaistuksen ammattilainen, joka auttaa kaikissa valotarpeissasi täsmällisesti ja luotettavasti. Monipuolinen tuotevalikoimamme koostuu huolella valituista, laadukkaista Euroopassa valmistetuista valaisintuotteista. Kosketinkiskot sekä osa edustamistamme valaisimista valmistetaan Suomessa. Vuosien kokemus ja toimiva logistiikka takaa täsmälliset toimitukset sekä parhaan lopputuloksen juuri sinun kohteesi tarpeisiin.
